

CREATED BY FIRE.
SURROUNDED BY WATER.
BEAUTIFIED BY EARTH.
POWERED BY WIND.

The elements have combined to make Maui one of the most naturally beautiful places on earth. The people of Maui want to keep it that way. That's why we've developed an alternative source of power that may even help us to eventually become energy independent, while keeping our environment clean and beautiful. What could be more natural than harnessing the power of our hearty tradewinds to pro-

duce a little earth-friendly electricity?

Wind power is the future. It is clean, non-polluting, and best of all, we'll never run out. Maui's community can be proud of its progress toward creating clean, renewable energy sources, improving our state and

national security through energy independence, and leaving a healthier environmental legacy for many future generations. Together, we've got the power.

KAHEAWA WIND POWER
